Subject: SEMscan30 Pro CD

Dear Jim,

First about how to pay, you can send 500 US$ to the ABN Bank using to following code;

Send to J.W.H. Vaessen
Swift code ABN – ANL – 2R
Bank account number 57 95 96 524

As extra you can make a remark "SEMscan30Pro"

I will prepare this week the CD, so please send me your Name and Address then I can send it the end of this week.

I read about your project and I must say it looks very good because with this you can get a lot of interested students, which normally never get a change to enjoy such a project. Specially also the corporation between different groups of students makes it interesting and create a lot of stimulation for all of them.
If students now what they are doing has sense and value then they do it with passion and what is a better way to get students interested in study then this way. On this way they learn how to corporate and build something by them self, get proud on they work and study and even make name. I'm sure you can make the students the same way exciting as you get when you was 12 years old and later you get that change on the university.
Therefore I hope you keep me inform about your project and let me know when the first homepage are finish and with pleasure I like to make a link on my homepage to promote your project.

Finally I belief this is a great project and a big contribution to the world of education you make.

With great respect and kind regards,

Jan Vaessen

p.s. could you give me the final information of the connection points and resistors you use for technical documentation?
